Question 1: Question 1: How does agriculture make food available for communities and what are the risks associated with it?

Student's Answer:

Answer: Agriculture is very vital because it makes food available for communities. However, agriculture has risks since it depends on climate and when there is adverse climate change there is a possibility of famine.

Correct Answer:

Answer: Agriculture is very vital because it makes food available for communities. However, agriculture has risks since it depends on climate and when there is adverse climate change there is a possibility of famine.

Marks Awarded: 5.0 out of 5

Feedback: Excellent work!

Question 2: Question 2: What are the six characteristics of industrial agriculture and how do they influence the benefits and risks?

Student's Answer:

Quiz 9: List the six characteristics of industrial agriculture. What are the benefits and risks?

Answer: There are six features of industrial agriculture that include increased use of the multifaceted tools and the technology routine, augmented use of money in exchange for labor, amplified energy use, increased effect of the state, propensity to competition, specialty and overproduction, augmented interdependence between agribusiness and farm units. The features have increased high output of agricultural products because of its mechanization, and at the same time brought unemployment since most of the tasks done by people have now been mechanized.
