## Grading Report

### Question 1: Question 1: What are some reasons we might choose to use React?

Student's Answer:

To find out what virtual dom is used, see example one above. To find out what dom manipulation is, see the first example above. To find out what states and props are, see the third example above. Each question is a bullet point in the text.

*Correct Answer:*

*Answer: We can split our app into multiple components and reuse those components. React uses a virtual DOM to efficiently update the UI, which is better than updating content using DOM manipulation. We can use states and props that help in updating variable across pages.*
