Question 1: Question 1: Why we use React?

Student's Answer:

We can split our app into multiple components and reuse those components. React uses a virtual DOM to efficiently update the UI which is better than updating content using DOM manipulation. We can use states and props that helps in updating variable across pages.

Correct Answer:

I simplifies building complex web apps with reusable components, improving development efficiency. It offers a virtual DOM for faster update, React also provides state management making large-scale development more manageable.

Marks Awarded: 4.0 out of 5

Feedback: Your answer is mostly correct, but it could be more detailed and precise, especially in explaining the benefits of using states and props in React.
