Student Name: Khurshhed

Exam Title: Exam

Date: 2024-12-01

Total Marks Awarded: 8.0 out of 10

Grading Report

Question 1: Question 1: What is a sync function?

Student's Answer:

The async function always returns a promise. If we return a value instead of promise it will take this value wrap it inside a promise and then return it.

Correct Answer:

An async function always returns a promise. If we return a value instead of a promise it will take this value wrap it inside a promise and then return it.

Marks Awarded: 4.0 out of 5

Feedback: Your answer is mostly correct, but it would be more precise to specify that the async function returns a promise that resolves with the returned value.

Question 2: Question 2: How do we convert a promise into data?

Student's Answer:

We use then() method e.g., dataPromise.then((res) => console.log(res));

Correct Answer:

We use .then((res)=>console.log(res));

Marks Awarded: 4.0 out of 5

Feedback: Your answer is correct, but it could be more precise and directly address the question.
