Question 9: List the six characteristics of industrial agriculture. What are the benefits and risks?

Answer:

There are six features of industrial agriculture that include increased use of the multifaceted tools and the technology routine, augmented use of money in exchange for labor, amplified energy use, increased effect of the state, propensity to competition, specialty and overproduction, augmented interdependence between agribusiness and farm units. The features have increased high output of agricultural products because of its mechanization, and at the same time brought unemployment since most of the tasks done by people have now been mechanized.
