## Question 1: Q.1) What is async function?

Student's Answer:

The async function always returns a promise. If we return a value instead of promise it will take this value wrap it inside a promise and then return it.

*Correct Answer:*

*It always return a promise. It allows asynchronous, non-blocking operation. It uses await to pause execution untill the awaited task is complete. >>>>>*

Marks Awarded: 4.0 out of 5

**Feedback: Your answer is mostly correct, but could be more detailed and precise.**
