Question 1: Question 1: Why we use React?

Student's Answer:

WE can split our app into multiple components and reuse those components. React uses a virtual DOM to efficiently update the UI which is better than updating content using DOM Manipulation. We can use states and props that helps in updating variable accross pages.

Correct Answer:

I simplifies building complex web apps with reusable components, improving development efficiency. It offers a virtual DOM for faster updates. React also provides state management making large-scale development more mangeable.

Marks Awarded: 4.0 out of 5

Feedback: Good job on identifying key benefits of using React, but could improve by mentioning the efficiency in development and the manageability of large-scale development.
